## EXPERIENCE

### Technical Product Marketing Intern

Phool.co

October 2023 - December 2023, Kanpur

- Spearheaded sales and marketing data analysis using MS Excel, optimizing processes.
- Applied advanced Excel operations for efficient logistics and shipment optimization.
- Listed products on diverse platforms: Amazon, Flipkart, Blinkit, and Myntra.
- Integrated inventory management systems for seamless operations.
- Crafted compelling product listings with a focus on front-end optimization.
- Developed comprehensive Multilocation Excel sheets for efficient logistics.
- Successfully listed company products on Amazon US, gaining valuable global experience in managing tech-driven e-commerce operations.

### Software Engineering Intern

Docplus Online

March 2023 - June 2023, Remote

- Developed a healthcare application as a Flutter Intern at Doc Plus, actively contributing to the creation of cutting-edge mobile solutions for the healthcare industry.
- Led cross-platform healthcare app development using Flutter, leveraging the framework's robust features and Dart language to deliver a secure and user-friendly healthcare experience on both iOS and Android platforms.
- Collaborated closely with senior developers and the development team, engaging in code reviews, debugging, and testing processes, while gaining valuable insights into healthcare app development best practices and making significant contributions to the success of critical projects at Doc Plus.

## SKILLS

C/C++, Java, Android Development, Dart, Flutter, JavaScript, Node, Express, MongoDB, Python, JavaScript, SQL, Data Structures, OOPS, Networking, DBMS, Operating Systems, Kotlin, Git and Github, REST API

## PROJECTS

### Flash Chat

May 2022 - June 2022

- Developed Flash Chat, a real-time messaging app utilizing the Flutter framework.
- Enabled users to create accounts, securely log in, and engage in real-time chat interactions.
- Implemented Firebase as the backend service to store user data and manage messaging seamlessly.

### Weather Application (Clima)

February 2022 - March 2022

- A weather app that displays current weather conditions, temperature, humidity, and wind speed for a selected location.
- You can use the OpenWeatherMap API to fetch the weather data and display it in a user-friendly manner.
- Implemented geolocation functionality to automatically detect the user's current location and display weather information, enhancing user convenience.

## INVOLVEMENT

### Flutter Developer

Vellore Institute Of Technology, Vellore • IEEE-Computer Society • August 2021 - Present

As a dedicated Flutter developer at the IEEE Society, I collaborated with a talented team to create innovative mobile applications. Leveraging the Flutter framework, we designed and implemented feature-rich apps that delivered exceptional user experiences across multiple platforms.

### Technical Project Manager

Vellore Institute of Technology, Vellore • Apple Developers Group • August 2021 - Present

At ADG Chapter, I played a pivotal role as a Flutter developer, contributing my expertise to the development of cutting-edge mobile applications. As a valuable member of both the management and technological teams, I collaborated directly with team members, fostering a cohesive and innovative work environment.

## EDUCATION
